

Smart Aerial

Smart Aerial provides locksmiths with the ability to write pre-coding data onto various transponders found within Fiat® and VAG® vehicle keys and then write the pre-code data onto a blank transponder. **Smart Aerial must be used with Smart Dongle.**

- **Smart transponder pre-coding:** Smart Aerial is designed to simplify, streamline and reduce the overall time spent programming keys for your customers, enabling you to work smarter by minimizing the use of additional pre-coding tools.
- **Pre-coding data reading and writing:** When connected to Smart Dongle and used with a programming device, Smart Aerial becomes a powerful asset for the locksmith. Pre-coding data are read seamlessly in the background and then written automatically onto the blank transponder.
- **Automatic procedure for preventing mistakes:** The entire pre-coding procedure runs automatically to avoid mistakes linked to the manual input of data. You will just have to connect Smart Aerial to Smart Dongle and place the key in the dedicated slot.
- **Lightweight and portable:** Smart Aerial has been designed with practicality in mind. It is easily transportable and will save space in your tool kit.
- **Fiat® and VAG® transponders pre-coding:** Smart Aerial can write pre-coding data onto ID48 and ID46 transponders found within various keys for Fiat® and VAG® (Audi®, Seat®, Škoda® and Volkswagen®) models - providing you have the key programming and pincode reading software loaded onto your programming device.

TOOLS NEEDED:

- MVP Pro or AD100 Pro
- Smart Dongle
- ADS185 Fiat Software
- ADS219 VAG Software
- Blank transponders
- Key blanks

Order #	Item #	Unit Price
026-1005	ADV SMART AERIAL	\$338.00

PRE-CODING PROCEDURE
